LUBELESS UPGRADE KIT

Kit Includes:

- Upgraded draw valves
- Exclusive draw valve X-rings (replaces traditional O-rings)
- Rear beater seals
- Upgraded freezer door gasket
- Upgraded orifice and air tube O-rings
- Freezer door bearing
- One-to-one parts template for easy identification of components

X-H-ring for multi-flavor soft serve machines (sold separately as a service part)

Hydra Rinse makes it easy to maximize food safety, starting with self-lubricated compounds, O-rings and seals for use in soft serve machines. We are the first and only product line to be NSF-listed for our “lubeless” compounds, O-rings and seals.

The elimination of food safe lube helps prevent bacteria and yeast contamination so it is easy to keep your soft serve machine cleaner than ever before. Beyond cleanability, the elimination of lube results in a greater time and cost savings making Hydra Rinse parts the clear alternative to the status quo.

Our exclusive X-H ring for multi-flavor soft serve machines eliminates product mix crossover.

REPEATABILITY

- Reduces labor cost associated with applying OEM lubricants

CLEANABILITY

- Maximizes food safety with NSF-listed self-lubricated compounds, O-rings and seals to help prevent microorganism contamination against bacteria, yeast and fungi
